

FAIRPORT

Building on quality

Euro Screed

A time saving and easy to use surface screeder. Use off formwork or screed rails or free screed without. Fast and simple vibrating, striking off and smoothing.

- Beam and power unit easily separated for transport and storage. Just two nuts and bolts.
- Beam / Blades and power unit interchangeable with other makes.
- Adjustable handle height and angle for increased comfort during prolonged working times.
- Lever throttle and convenient engine kill button for instant control.
- Beam section shaped for productive working. Rolling a surcharge or free floating.
- Shaped beam ends minimises any 'tram line' effect.
- Reliable clutch gives a smooth power take up.
- Solid vertical drive in a sealed unit puts power to the vibrator right where the action is needed.
- Select from a choice of beam lengths to suit your job requirements.
