

- Heavy duty roll-cage with lifting eye.
- Hydraulic forward & reverse mechanism - infinitely variable.
- On-the-spot compaction.
- Reverse travel safety protection ensures machine travels forward if operator releases the handle.
- Impact resistant and open, self cleaning baseplate.
- Sealed belt cover design for protection to clutch and belt.
- Handle folds to 45° and 90° for transportation and storage.

## FPR Large Reversible Plate Compactors

Ideal and versatile for high production efficiency on sand, gravel and cohesive soils. Increased compaction force with smooth transition between forward and reverse travel.

*Transport wheels and electric start options available for both models*

	Engine	Power HP / kW	Centrifugal Force kN	Plate Size W x L mm	Vibrator Frequency VPM	Travel m/min	Weight Kg	Order Code
